PROFESSIONAL SUMMARY

User Experience Designer with 19+ years of experience leading interaction design, design systems, and design operations for enterprise-scale digital products. Currently at Amazon Web Services designing AI-native Observability and Security experiences for millions of enterprise customers. Track record of running structured usability research, building design systems adopted across multiple product domains, and driving measurable outcomes, from research insight to engineering handoff. Experienced in WCAG accessibility, cross-functional leadership, and AI-native product design and strategies. Currently use Kiro IDE to create production-grade prototypes from day one, no static mockup lag.

EXPERIENCE

Senior UX Designer – CloudWatch, Observability & Security, CloudTrail

Amazon Web Services (AWS) . Atlanta, GA . April 2024 - Present

- Designed agentic investigation experience targeting ~73% reduction in mean time to resolution vs. 30-90 minute industry average replacing static dashboards with a session-based, AI-augmented collaborative workspace.
- Led the UX design of CloudWatch Omni's Observability an off-console application - transforming a dashboard-centric monitoring tool into an AI-native investigation platform serving millions of AWS enterprise customers across cloud's observability, security, and governance domains.
- Led Rhythm Core design system across 5 product domains (Observability, Security, Governance, OpenSearch, MCP app), establishing versioned governance model and cross-team design review across 12 designers.
- Applied WCAG accessibility standards to all Omni UI components, established accessibility as a required review gate in the design-to-engineering handoff process across all 5 product domains.
- Constantly producing engineer-ready live prototypes using the Kiro IDE, eliminating the static mockup handoff gap entirely.
- Led end-to-end design of the AWS CloudTrail's Aggregated events, Cost estimator, Data event coverage and Data event Insights workflows by active co-ordination with the Product and Engineering teams.

Senior Manager UX

Target . Bangalore, India . Jun 2022 - Feb 2023

- Initiated and led Design Ops program across global and cross-functional teams, improving design process efficiency, standards documentation, and workflow across 5+ concurrent product tracks.
- Managed distributed UX team end-to-end including hiring, mentoring, and weekly design quality reviews; established feedback cadence and heuristic evaluation standards adopted team-wide.
- Partnered with senior leadership to align the design roadmap with business priorities; owned resource allocation and tooling investment decisions for the design organization.
- Embedded WCAG 2.2 accessibility compliance into team-wide design process and made it a required criterion in all design review checkpoints across active product tracks.

Senior Staff UX Designer

Fourkites . Bangalore, India . Sep 2021 -May 2022

- Led UX strategy and interaction design for an enterprise logistics visibility platform serving Fortune 500 customers, owning the product from research through handoff.
- Conducted user research and task-based usability testing to identify friction in core operator workflows; findings directly drove IA restructuring and navigation improvements that shipped within one sprint cycle.
- Built and governed design system guidelines ensuring visual and interaction consistency across all product surfaces; reduced design inconsistency issues flagged in engineering QA.

- Collaborated with PM, engineering, and data teams daily to align on requirements, manage tradeoffs, and deliver production-ready designs on schedule.

Senior Interaction Designer

Philips Lighting (Signify) · Bangalore, India · Feb 2016 - Aug 2021

- Led UX independently across two distributed design teams (Bangalore and Netherlands) -managing design direction, research planning, and delivery across both locations without a local design manager.
- Played a leading role in developing the Design Language System "Interact" -a cross-platform component library that standardized design patterns and drove consistency across Signify's enterprise digital product portfolio.
- Held SAFe PM/PO certification, served as active Product Owner on multiple projects-wrote user stories, proposed MVPs, managed backlogs, and led quarterly Program Increment planning across Agile release trains.
- Conducted remote user interviews and on-site ethnographic research at customer locations; research directly informed IA decisions and core workflow redesign across the product portfolio.
- Oversaw the full design lifecycle from requirements through handoff, managed scrum teams within the Agile Release Train and contributed to program epic backlog and product architectural decisions.
- Integrated accessibility considerations into all design solutions, advocated for inclusive design practices across the team and in cross-functional design reviews.

EARLIER EXPERIENCE

Senior Software Engineer, Amadeus (Feb 2013 -Feb 2016) - UI/UX design, wireframing, prototyping, information architecture, design systems, front-end development (HTML, CSS, JavaScript), accessibility, and version control.

Visualization Specialist, Nabler Web Solutions (Oct 2012 - Feb 2013) - Data visualization, dashboard interaction design, spatial data mapping, and transforming complex data into actionable interfaces.

Web Designer, Hawkzweb (Apr 2007 - Oct 2012) - Graphic design, typography, branding, content management systems (CMS), responsive web design, and multimedia.

SKILLS & TOOLS

Design: Agentic UX Design, User Research, Usability Testing, Interaction design, Information Architecture, Prototyping, Accessibility (WCAG), UX Writing, Design Systems, Customer journey mapping, Contextual inquiry, Empathy mapping, Task Analysis, Heuristic Evaluation.

Tools: Kiro IDE, Figma, Sketch, Miro, Adobe Photoshop, InVision, HTML, CSS, JavaScript, jQuery

Methods: Moderated Usability Testing, Task-Based Evaluation, Design Sprints, Agile / SAFe, Program Increment Planning, A/B Testing, Affinity Mapping

Leadership: Design Operations, Cross-functional Collaboration, Team Management, Hiring & Mentoring, Stakeholder Management, Resource Planning, Design Governance, Product Ownership

EDUCATION

M.Sc Psychology (Counselling Psychology) - Pursuing

B.C.A — Bachelor of Computer Applications

CERTIFICATIONS

Certified Usability Analyst (CUA) — Human Factors International (HFI)

SAFe Certified PM/PO (Project Manager / Product Owner) — Scaled Agile Framework
